

Lesson Objectives

Using the “Planet Measurement Activity” wiki and the nineplanets.org website, the seventh-grade Earth Science students will be able to identify and record the relevant planetary measurements with 100% accuracy.

Using the “Planet Measurement Activity” wiki and the nineplanets.org website, the seventh-grade Earth Science students will be able to assemble and organize the information into the chart on the wiki with 100% accuracy.

Using their collected data, the seventh-grade Earth Science students will be able to present their information orally to the class as they compare and contrast the various measurements for each planet with 90% accuracy.
