## MEDT 7462 3.4 Useful Educational Tool

A useful educational tool for the classroom that I have found is <http://www.donquijote.org/spanishlanguage/alphabet/>. At this website, students can click on letter of the alphabet. When they do, there is a picture that appears, that gives an example of a word in Spanish that starts with whatever letter the student clicked on. There is also a picture, as well as the option to click on the letter or word to hear them.

I think this would be very useful for students to practice the alphabet at home. Since most students only hear Spanish an hour or so a day in class, this gives them the option to hear it and practice at home correctly. I think this is a great site for students that are just starting out!
