# HOW TO SET UP/USE AN LED PROJECTOR WITH A

# COMPUTER AND VCR/DVD PLAYER (and SPEAKER)

LED PROJECTOR:     Sharp PG B10S Notevision Projector

COMPUTER:              IBM Thinkpad R50

VCR/DVD PLAYER:    Panasonic, Model # PV-V4523S

SPEAKER:                Califone PA-300

## LED PROJECTOR & COMPUTER

Step 1:    Locate the cable plug-ins on the back of the projector, and find the computer component cable plug-in (Input 1).

Step 2:    Plug the computer cable into the projector, tightening the screws to secure it in place.

Step 3:     Locate the port for the same plug on the computer.

Step 4:     Plug the other end of the cord into the computer.

Step 5:     Turn the LED projector and the computer on. Through either the projector remote or the controls on the projector itself, select the input device to be used (computer).     INPUT

Step 6:    Use the computer controls to display items on the screen.
Use the lens shift and focus controls on the projector to
adjust the picture.

# LED PROJECTOR & VCR/DVD PLAYER (with SPEAKER)

Step 1:    Locate a video input port on the back of the projector. (In this photo, the plug is already in place.)

NOTE:    You will be using an A/V cable with red, white, and yellow plugs at each end. The yellow is for video input, and the red and white plugs are for sound.

Step 2:    Taking the set of plugs on one side of the cable, plug the yellow piece into the video input port on the projector.
Step 3:    Locate the ports on the back of the speaker. Plug the remaining pieces (red and white) into the corresponding ports on the back of the speaker.

Step 4:    Locate the ports on the back of the VCR/DVD Player.

Step 5:    Plug the other end of the cable (red, white, and yellow pieces) into the back of the VCR/DVD Player at the corresponding ports.

Step 6:    Turn the LED projector, the VCR/DVD player, and the speaker on. Through either the projector remote or the controls on the projector itself, select the input device(s) to be used (VCR/DVD player & speaker).

INPUT

Step 7:    Use the VCR/DVD player controls to display items on the screen. Use the lens shift and focus controls on the projector to adjust the picture.
