An internet tool that I think is very useful is iKeepbookmark. Before using this website, I created a webpage at school mostly of hyperlinks. I know this doesn't sound very interesting, but I really just needed a place for my students to quickly click on a link rather than typing an entire web address. Many times when I gave an address students would mistype and it would take the class a long time to get to a website. Allowing the students to just click on a link saved time and frustration. Unfortunately, my webpage is hosted on the school's system website and I was unable to change and add things to it. I was also unable to upload my webpage because someone from the central office blocked it. Now in using iKeepbookmarks.com, I can easily add links from any computer with internet access at any time.
