3/8/2011 14:01:36	Math	8	Intermediate	Intermediate	Memio Board	Daily	3-4 years	Very little	The device is supported by a laptop with limited speed and memory	Student instruction and interaction		
3/8/2011 14:07:49	Business & Marketing	5	Intermediate	Intermediate	I have used the Poliriod smart board that is now in the Lab (room 212)	Rarely	1-2 years	I have participated in some training provided by Arlie Osborne. This was 2 years ago.	I would like to use the hand held version. I used the large smartboard and I really had no place to store it when I was not using it.	Currently not using IWB.	I would really like for the students to use this technology during their presentations.	
3/8/2011 14:08:23	Math	20 or more	Intermediate	Beginner	Do not currently have an IWB in my classroom.	Daily	1-2 years		From speaking with teachers that have the technology, The IWB needs to be mounted to the wall in order to remain calibrated correctly.			I would like to see the technology provided for everyone in the math department.
3/8/2011 14:10:43	foreign language	20 or more	Advanced	Intermediate	i have a document printer and mimeo board	Rarely	1-2 years	none	Absolutely! Not having an overhead mounted projector makes space an issue. Unpluggin one device to use another is a pain as well. As another teacher routinely borrows my stuff, I don't have access to it to plan	right now it is not	yes. Install overhead mounted projectors. Get everyone one. Have some staff development.	I can't wait for the new technology to arrive! We are sadly in need of updated EVERYTHING. We have to make hardware and network access more user friendly. We need more troubleshooting help as the problems arise, not days and weeks after. It is SO hard to try to implement some technology only to find the network down. Now, I always have to have a plan B just in case.

												No technology purchase is useful without the proper training and collaboration time to implement the new strategies that the technology allows for. Its a WASTE of money to purchase those things if no one knows how or why to use them. And we are too busy to take our planning time for training purposes--not to mention that it will not be enough time, even if we do. Without the proper training and collaborative efforts to properly use any IWB, its just a REALLY expensive chalk-board.
3/8/2011 14:11:32	English	15	Intermediate	Beginner	N/A	Never	1-2 years	We have not been offered any professional learning for IWB's, probably because we don't have any. The ones "on wheels" are not effective because they are not hooked up--they must be present all the time in order for them to be useful.	N/A	N/A

3/8/2011 15:15:13	English	16	Intermediate	Beginner	I have no extra technology in my classroom. I use a dry erase board for everything. During journalism, a computer based class that is entirely online, I have 8 computers (2 computers and all monitors bought solely with yearbook ad money) and 20-27 students. I have no way of even showing my computer screen (to talk about continuity or teach design or photography) to students and end up drawing pictures on the dry erase board of yearbook pages and using shapes to represent people. No other computer class in the school faces this type of shortfall. We have one laptop and projector for the entire department to check out (which has a "sometimes lucky" connection to the wireless Internet upstairs). We have no extra software to edit photographs and all camera equipment was purchased by selling ads to local businesses. My phone does not even work.	Never	1-2 years	I have been to two demonstrations of the Interactive White Board.	Lack of available technology and an infrastructure that cannot handle the current technology.	I do not have an IWB device.	I would love to integrate more technology, but I need the technology first and then some meaningful training on how to make the most of it.	If you buy it, I will use it. :)

3/8/2011 15:24:01	Business Education	17	Intermediate	Intermediate	I have a Mimio but I will admit I am not using it at this time.	Never	1-2 years	I have had none.	As far as the Mimio goes. It is just making myself find the time to sit down and learn it. I also understand that I am suppose to sign up for a class on it in the media center and I have not done that either.			I think that teachers not only need training on how to use the white board, but they also need training on how to teach using a white board. My daughter has a teacher that uses a white board daily and Karlie hates the thing. She says that her math teacher puts the problem on the white board and then moves on to the next problem too quickly. If the teacher was using a marker board the problem would stay on the board and the student would have more time to write it down, compare problems, and absorb the instruction. As veteran teachers we don't want to be told how to teach, but we still need to be instructed on how to teach using new technology.

3/8/2011 15:39:58	Social Studies-Special Ed Inclusion & Resource	20 or more	Intermediate	Beginner	Beginning to use Mimio but still a beginner at it!	Rarely	1-2 years	Several years ago I ordered a smart board to use in an Inclusion class I was teaching at another high school. I had one training session. We ordered at the end of the year and the following year I came to LFO. I also went to a curriculum convention at the Opryland Hotel where they were demonstrating the use of a smartboard before I ordered the board.	I just think I need additional training in order to feel comfortable using some of the new technology. The fact that we have Arlie here is wonderful and he does a great job helping us. I also think during In-Service, if workshops were offered, teachers would attend.	I do not have one in my classroom but would love to have one!	I think the fact that Arlie does offer training is very helpful. Time is a crucial factor and that is why I suggested In-Service time as an alternative to our planning block time in which to get assistance.	I think most teachers welcome any new technology and training to accompany it!!! I would like to learn more technology and integrate its use into the classroom more.

3/9/2011 6:52:21	English - including Special Ed	10	Intermediate	Intermediate	Mimio	Rarely	1-2 years		Newness of the product and the lack of training. I have used electronic jeopardy, interactive white board and bluetooth technology but using a mimio is different and I am having some difficulty. Having a working laptop computer is a part of the problem.	For students to write and correct each others work while seeing it at the same time. Instant understanding because it can be seen as it is corrected.	Oh yea. Training and having someone to go to when a question arises. A person that is available during school hours.	I think technology is an asset to the classroom but it needs to be used and understood to be utilized. I also think it is very important that ALL classrooms have equal access to the same technology to better serve the students. Technology is ever changing and improving but if we begin now we give our teachers and students a fighting chance.

3/16/2011 14:53:22	Special Education	20 or more	Intermediate	Intermediate	None.	Never	1-2 years	The required technology training implemented approximately 6 or 7 years ago - completed this training prior to teaching at LFO.	I do not have any of these devices with which to work - so I can't report on challenges or barriers in that regard. I have requested various devices - but I have not received them.	I do not have any IWB devices to use in my classroom at this time.	I can't report on this until I have said device(s) to implement in my classroom.	I have used some IWB devices in OTHER classrooms (briefly), but I do not have IWB devices in my own classroom. I would love to have IWB devices to enhance the learning of my students - and I learn fast, so I could teach myself how to implement it with a little assistance from someone who specializes in the use of IWB devices. Thank you!
