

Carolina's MEDT 6401 Course Portfolio

Course Description

An overview of communication and technology as it relates to teaching and learning; including the design, production and utilization of materials and operation of audiovisual equipment and microcomputers.

Assignments

Assignment 3.1: The Course Portfolio

I really enjoyed this assignment and I learned a lot from it. I had never tried to do a website before so this was a completely new experience for me. It took me a while to follow all the steps and I had to listen to the directions a couple of times, but I successfully started my website. We are in a time period in which websites are not only great educational resource but also our link to communication with the world. Knowing how to create my own website will be beneficial to me in many ways. I plan to pursue a career in Speech Pathology and one day I also want to have my own business. Having a website of your business is very important for marketing purposes and to attract new clients. I can also create a website just for fun to share information with others. I do not longer have to hire somebody to create it for me, I can do it by myself just by using NVU and WinSCP!

Assignment 3.2: Inspiration

Assignment 3.3: A Georgia WebQuest

Assignment 3.4: Creating your own WebQuest
