

## **Link to GA Standard**

ELA4LSV2

The student listens to and views various forms of text and media in order to gather and share information, persuade others, and express and understand ideas.

When delivering or responding to presentations, the student:

b. Uses notes, multimedia, or other memory aids to structure the presentation.

## **Analyze learners**

4<sup>th</sup> grade students in a gifted resource class. 10 female, 7 male students, 2 socioeconomic disadvantaged children, 3 students with attention issues

## **Prior knowledge**

Students have general computing skills in that they know how to use a mouse, click on icons, use pull down menus and drag and drop.

## **State objectives**

Given a presentation and given computers with Internet access and PowerPoint software, 4<sup>th</sup> grade students will be able to copy and paste an image from the web onto a PowerPoint slide with 100% accuracy.

## **Select instructional methods, media, and materials**

Microsoft PowerPoint 2008, classroom computers, Internet access, SmartBoard (for teacher presentation)

## **Utilize the media and materials**

Students will use the search engine "Google" to find an image, and then paste that image into a PowerPoint slide using a classroom computer.

## **Require learner participation**

Students will self select an image from Google, copy the image using one of the three accepted methods, (right click, edit>copy, or drag/drop), and paste the image into a PowerPoint slide.

## **Evaluate and revise**

The teacher will observe the students as they copy the images and take anecdotal records of student mastery. The teacher will ask each student the method used to copy the image.
