CS 6242: Software Development II (3 credit hours)
Course Syllabus

Instructor

Will Lloyd
Email: wlloyd@westga.edu
Voice: 678-839-6654
Web: http://www.westga.edu/~wlloyd
Office: TLC 2-208
Office hours: see web site

Course website

We will again use the Moodle course management system.
URL: http://courses.cs.westga.edu

Class meeting

Time: Tuesday, 5:30 – 8:15
Location: TLC 1210

Class format

This class will be offered in a blended format, with both face-to-face class sessions and asynchronous online exercises. We recommend a broadband connection for online access.

Catalog description

This course continues the introduction to the software development process begun in CS 6241. Topics include software development process models, process management, requirements specification, and software modeling.

Prerequisite

CS 6241.

Textbook

None. We will use online resources.

Software

As a CS major, you have access to many developer tools and operating systems through department and UWG agreements. For more information, visit www.cs.westga.edu/Facilities/Software.

Assignments	We will perform a variety of individual and group software development exercises. Exercises will be assigned every week to help you master the material. ***I don't accept late work.***
	You should discuss the assignments with fellow students and with Will. However, do not look at or copy another student's solutions when writing your solutions or code. All work must be your own, unless otherwise stated. You should work with others to understand the material, but once you reach understanding, you must provide your own solutions. Assignments where cheating has been determined will receive a zero and possible dismissal from the course: see the section on Academic Honesty below.
Quizzes	Some topics may be assessed by an online quiz. You are allowed to consult books and online resources for a quiz, but you may not get help with anyone else while taking a quiz.
Grading	Each assignment and quiz will be worth 1 – 10 points. Your grade will be determined by the percentage of total points your work earns, using the standard grading scale: 90 – 100 A, 80 – 89 B, 70 – 79 C, etc.
Academic honesty policy	Exercises, quizzes, and projects must be done individually, unless otherwise explicitly written in the assignment's description. Don't use the work of others or let someone else use your work. You will receive an F for the course if you cheat, whether you are the source or the user of the shared work. The incident will also be reported to the Office of Student Affairs so that they can determine if further disciplinary action is warranted.
Class management	Please turn off your cell phones and pagers during class.
Special Needs	Any student sanctioned by the Office of Disability Services must have a Student Disability Report and a Disabled Student Handbook available to share with the Faculty before any graded work is determined so appropriate arrangements can be made. For more information, please visit www.westga.edu/~dserve/menu.html.
