

## **Reflection on MEDT 7468 E-book**

This project covered the following standards:

- NETS 1A: Promote, support, and model creative and innovative thinking inventiveness
- COE Conceptual Framework 4. Adaptive: Candidates should be able to demonstrate flexibility and strategic planning appropriate to a wide variety of learners for effective transformational systemic change

For this project I had to use PowerPoint to create an electronic or digital story. Creating an e-book for was both fun and challenging. I created an e-book that children can navigate by themselves and another version that runs automatically. The e-book was narrated by my daughter and contains corresponding animated text. I chose to base my story on Eric Carle's book, *Brown Bear, Brown Bear*. I chose to name my book *Yellow Submarine, Yellow Submarine* and used different colored ocean animals in my story. This project required a lot of creativity and a lot of patience in order to get the animation and narration just right. This type of project is suitable for multiple audiences as it has both audio and text and also has a version which can be navigated at the user's own pace.
