

## **Reflection on MEDT 7462 Course Website**

This project covered the following standards:

- NETS 1B: Engage students in exploring real-world issues and solving authentic problems using digital tools and resources.
- COE Conceptual Framework 8: Knowledgeable: Candidates should be able to demonstrate general knowledge inherent in a liberal arts curriculum, advanced knowledge in content areas, and specific knowledge in professional education for the implementation of transformational systemic change.

This class and the creation of this website were very beneficial to me. This was one of my first experiences really stopping to reflect on each and every assignment. I found that it made each assignment more meaningful. I love that it provided me with a wonderful resource and testament to my work. Additionally, I covered numerous topics in this class from Google Earth to Picasa. I loved that we covered a wide variety of topics. It exposed me to many tools and the choice to delve further into the applications if we chose to.
