

## **Reflection on MEDT 7464 & 7468 Retrospective Papers**

This project covered the following standards:

- NETS 1C: Promote student reflection using collaborative tools to reveal and clarify students' conceptual understanding and thinking, planning, and creative processes
- COE Conceptual Framework 10: Reflective: We believe that candidates should be able to demonstrate critical thinking skills in the diagnosis and prescription for transformational systemic change

Both of these papers required a lot of time, effort, recollection, and analysis of everything accomplished in the courses (Introduction to Multimedia & Integrating Technology into the Curriculum). I had to analyze each project in the course and relate it back to the course text. Additionally, I had to explain how the class impacted my thoughts about multimedia and integrating technology. It really forced me to think about what all I had accomplished and what was beneficial and applicable for my classroom. Lastly, I had to comment on my values, experiences, skills gained, and challenges I had in each class. Both papers require a serious analysis of both courses in their entirety.
