Reflection on MEDT 7464 Blog

This project covered the following standards:

- NETS 1C: Promote student reflection using collaborative tools to reveal and clarify students' conceptual understanding and thinking, planning, and creative processes
- COE Conceptual Framework 10: Reflective: We believe that candidates should be able to demonstrate critical thinking skills in the diagnosis and prescription for transformational systemic change

In MEDT 7464 I was required to create a blog using Blogger about technology integration. I created the blog and became familiar with the different features and tools within the blog such as adding pictures, surveys, contributors, banners, etc. Throughout the course I made posts to my blog about topics related to technology integration as well as reflected on projects and discussions that we were having as a class. I also viewed my peers' blogs and commented on their posts. It was through this project that I truly recognized the educational value of a blog as a tool to record students' progress and provide a great forum for reflection. Blogs also provide a place for a group of people to share their thoughts and opinions.
