

Reflection on PTED Wimba Presentation

- NETS 1D: Model collaborative knowledge construction by engaging in learning with students, colleagues, and others in face-to-face and virtual environments
- COE Conceptual Framework 5: Collaborative: Candidates should be able to develop skills to work effectively with various stakeholders involved in the educational process that will bring about transformational systemic change

For this project I collaborated with a partner to create an informative PowerPoint presentation about character education. The presentation was then presented to the entire class and our professor via Wimba. My partner and I collaborated using Wimba, email, phone calls, and the chat room. We practiced in Wimba a few times since neither of us had used Wimba before. We worked together effectively and ultimately delivered a presentation to our classmates and professor that could also be presented to parents, administrators, and teachers to educate them about the history and value of character education
