

Reflection on MEDT 7468 Interactive Quiz, MEDT 7468 Instructional Presentation, & MEDT 7466 Digital Storytelling Project

- NETS 2A: Design or adapt relevant learning experiences that incorporate digital tools and resources to promote student learning and creativity.
- COE Conceptual Framework 4: Adaptive: Candidates should be able to demonstrate flexibility and strategic planning appropriate to a wide variety of learners for effective transformational systemic change

I loved all three of these assignments. They each allowed me to use tools that I was somewhat experienced with but the process expanded my knowledge with both PowerPoint and Movie Maker. I have had my students create interactive quizzes in PowerPoint and it has turned out to be successful. I gave them each sample questions from the CRCT, and then they took turns taking each other quizzes. All three of these assignments challenged me to be creative and also forced me to think about how I can use the tools in class, as well as have students create the same type of tools.
