

## **Reflection on MEDT 7464 Comic Life and Voice Thread Projects**

These projects covered the following standards:

- NETS 3A: Demonstrate fluency in technology systems and the transfer of current knowledge to new technologies and situations.
- COE Conceptual Framework 3: Life Long Learners: Candidates should seek continually to improve their knowledge, disposition, and skills to influence transformational systemic change

For the Comic Life project I created six days of comics using the Comic Life software that were related to specific standards. This was my first exposure to Comic Life. It was a challenge to come up with something creative and suitable, but ultimately after creating my project and reviewing my peers' projects, it was clear to me that Comic Life was an effective tool that could be used in the classroom while meeting state standards. The software was also user-friendly.

For the Voice Thread Project I created a Voice Thread that involved my coworkers commenting on their current knowledge and understanding of the web 2.0 tools Wordle, Comic Life, and Blogger. This was also my first exposure to Voice Thread. I found it very easy to use and think it is a very effective way for students and teachers to collect, collaborate, and present information.
