

Reflection on MEDT 7462 Assure Lesson

This project covered the following standards:

- NETS 3D: Model and facilitate effective use of current and emerging digital tools to locate, analyze, evaluate, and use information resources to support research and learning.
- COE Conceptual Framework 3: Life Long Learners: Candidates should seek continually to improve their knowledge, disposition, and skills to influence transformational systemic change.

This assignment was my first exposure to the concept of the ASSURE model. I found it very effective and simple to use. It is particularly idea with creating lessons for students and faculty. For this lesson, I chose to teach a little bit about Gliffy. I had just been exposed to Gliffy in my educational psychology class. I did present this to one class and they were receptive. I demonstrated and the students also had hands-on practice. I have shown some teachers in my school this tool in the hopes that they would at least use it for brainstorming to add a visual element to their lessons.
