

## **Reflection on MEDT 6462 Grant**

This project covered the following standards:

- NETS 4B Address the diverse needs of all learners by using learner-centered strategies and providing equitable access to appropriate digital tools and resources
- COE Conceptual Framework 1 and 2: Decision Makers: Candidates should be able to demonstrate knowledge and skills when making decisions that will influence effective transformational systemic change. Leaders: Candidates should be able to demonstrate effective leadership skills to initiate and facilitate transformational systemic change

This project was the first time I had ever attempted to write a grant. I really felt clueless when I first began, but then everything seemed to fall into place. I created a "fake" grant that would provide at-risk students at the alternative school with supplies and materials that would allow them to make products in computer class. Some of the products were to be made in conjunction with academic subjects while other products were to be made in order to sell and use as a fundraiser in order to keep purchasing computer related supplies. I am proud to say that Dr. Cooper commented that my school system should have kept me on as a grant writer (after I was let go as an ITC). I hope that after I finish my master's degree I will have time to write some grants for my school.
