

Reflection on MEDT 6462 School Improvement Plan

This project covered the following standards:

- NETS 5B: Exhibit leadership by demonstrating a vision of technology infusion, participating in shared decision making and community building, and developing the leadership and technology skills of others
- COE Conceptual Framework 1 and 2: Decision Makers: Candidates should be able to demonstrate knowledge and skills when making decisions that will influence effective transformational systemic change. Leaders: Candidates should be able to demonstrate effective leadership skills to initiate and facilitate transformational systemic change

Prior to this assignment, I had not ever been directly involved with writing or assessing a school improvement plan. The goal of this assignment was to determine the technology needs, goals, and solutions for my school. I decided on this goal: all teachers use the SMART Boards with their students on a regular, rotating basis throughout the school year. I was responsible for coming up with action steps, a timeline, designating responsibilities, and creating a budget. This assignment taught me that it is important to look at the bigger picture and then zero in on a goal that is both important to the school and obtainable
