

## **Reflection on MEDT 7464 Retrospective Paper and MEDT 7464 Blog**

This project covered the following standards:

- NETS 5C: Evaluate and reflect on current research and professional practice on a regular basis to make effective use of existing and emerging digital tools and resources in support of student learning.
- COE Conceptual Framework 10: Reflective: Candidates should be able to demonstrate critical thinking skills in the diagnosis and prescription for transformational systematic change.

Both the retrospective paper and the blog for my MEDT 7464 class provided me with an opportunity to reflect on research and current technology. Some of the topics that were covered in my paper and in my blog were the use and value of project-based learning and the following web 2.0 tools: Blogger, Comic Life, Voice Thread, MovieMaker, and Google Docs. In addition, I spent a lot of time reflecting on effective technology integration in conjunction with PBL. In my blog, you will find references to specific articles and websites that relate to technology integration.
