Reflection on MEDT 7486 Emerging Issues Project & MEDT 7464 Voice Thread

This project covered the following standards:

- NETS 5D: Contribute to the effectiveness, vitality, and self-renewal of the teaching profession and of their school and community.

- COE Conceptual Framework 2: Leaders: Candidates should be able to demonstrate effective leadership skills to initiate and facilitate transformational systemic change

For my MEDT 7485 Emerging Issues project, I created a wiki that was geared toward convincing stakeholders that instructional technology coordinators are needed within our school system. I conducted surveys using Google Docs and a presentation using Prezi. For the Voice Thread Project I created a Voice Thread that involved my coworkers commenting on their current knowledge and understanding of the web 2.0 tools Wordle, Comic Life, and Blogger. This was also my first exposure to Voice Thread. I found it very easy to use and think it is a very effective way for students and teachers to collect, collaborate, and present information.
