Installing and Using the YouTube Downloader

1. Navigate to www.majorgeeks.com
2. Type Youtube Downloader into the search bar and click on the correct result
3. Select your download location and install the software
   a. VLC media player is an open source media player that is generally more reliable than Windows Media Player. I encourage you to download and install this player.
4. Navigate to www.youtube.com and locate a clip
   a. Copy the address
5. Open the Youtube Downloader
   a. Paste the address from YouTube
6. Select the download location
   a. I prefer to download my items to the desktop and move them afterwards.
7. Press the **Download** button on the Youtube Downloader
8. After your item has been downloaded, paste it into your flash drive
   a. Include the VLC.exe to ensure playback on the school computer.

Enjoy getting around the school firewall ☺
