VoiceThread allows an entire group conversation to be collected from anywhere in the world and then shared for playback in one place. VoiceThread allows an entire group conversation to be collected from anywhere in the world and then shared for playback in one place. VoiceThread subsen referred to as a "group audio blog" because, like a blog, it fosters comments on a topic but goes further by allowing these comments to be offered in audio format. The educational applications for VoiceThread are endless. From the most basic application, using it as an alternative to Power Point, to virtual schools and global classrooms. Students will become adept with the virtual meeting environment of tomorrow's workplace. Edit test) 	Documents
